DETAILED ACTION

Examiner has withdrawn 35 U.S.C 101 rejection on claims 1-20 upon clarification filed by the applicant.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-20 are rejected under 35 U.S.C. 102(e) as being anticipated by *Forbes et al*

USPN 6,381,742

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C.

102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention “by another,” or by an appropriate showing under 37 CFR 1.131.

Regarding claims 1, 8, 13 and 18

Forbes et al teaches,

a first definition data field defining the first data structure as a first namespace, the first

Art Unit: 2193

definition data field including a common name portion and a unique identifier portion wherein the common name portion is associated with the first namespace and the unique identifier portion is associated with the first namespace, the common name portion being configured to identify the first namespace in a human-readable manner the unique identifier portion being configured to distinguish the first namespace from other namespace (column 14, lines 20-48).

Regarding claim 2

Forbes et al teaches,

the first definition data field for the first namespace further comprises an element configured to indicate that the first namespace may be changed (figures 3, column 10, lines 11-30).

Regarding claims 3-6, 7, 9-12, 14-17, 19 and 20

Rejection of claims 1 and 2 is incorporated and further claims recites limitations from claims 1, 2, 8, 13 and 18, therefore claims 3-6, 7, 9-12, 14-17, 19 and 20 are rejected under same rationale.

Conclusion

Respectfully, applicant is reminded to read the cited art carefully.
